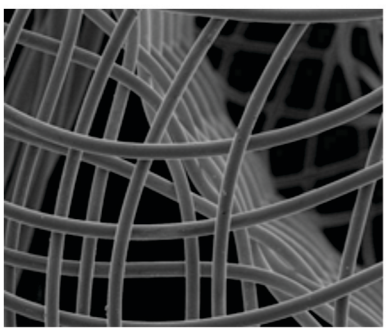
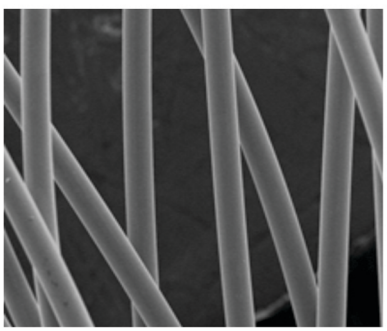
Platinum Coating Technology

The nitinol wire used in Cocoon Occluders is coated with **platinum** atoms (upto 25 microns) using nano fusion technology by plasma deposition

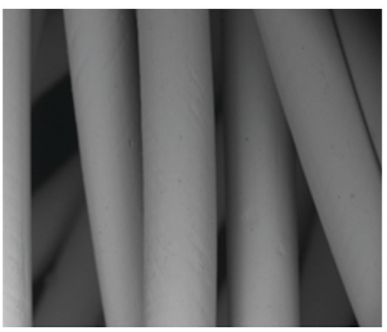
Raw Nitinol



Electropolished



Platinum Coating



Platinum coating makes Cocoon Occluders

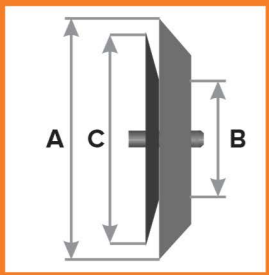
- **Biocompatible**
- **Non-corrosive**
- **Non-allergic**
- **More radiopaque**

Cocoon

Septal Occluder

Key Highlights

- Self-expanding, Self-centering double disc device with unique platinum coated Nitinol wire mesh
- Both disc are connected by a waist at the center
- Discs are filled with polypropylene fabric which assist thrombogenicity
- Ability to recapture and redeploy*
- 0% Erosion up to 43 months of follow up in more than 4000 patients[1]
- 95 to 100% Device Success Rate from early European experience[2]



Design:
Left atrial disc (A)
Device waist (B)
Right atrial disc (C)

Sizing Balloons	
Model	Balloon diameter
CAB24	24 mm
CAB34	34 mm

Cocoon Septal Occluder delivery system has sheath, dilator, loader and hemostatic valve

Usable length of compatible accessories (cm)

	6F	7F	8F	9F	10F	12F	14F
Sheath	60	60	78	78	78	78	78
Dilator	66	66	84	84	84	84	84
Loader	9	9	9	11	11	13	13

Delivery Cable

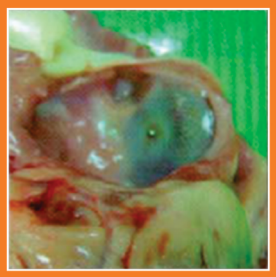
Description	Profile (Inch)	Length (cm)	Catalogue Number
6F Delivery Cable	0.077"	117	CDC6F

*Recapture and Redeployment is possible only if delivery cable is securely connected to the disc.

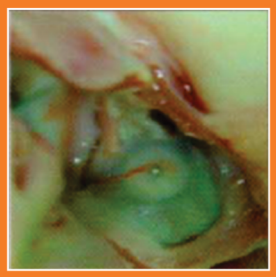
Cocoon

Septal Occluder

Pre-clinical Studies

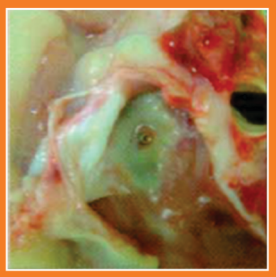


Neoendothelialization on the left atrial surface of the device at 36 days after implantation



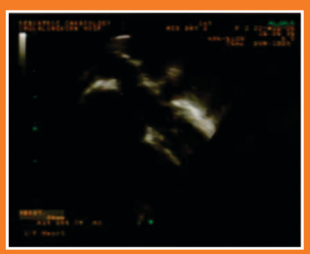
Neoendothelialization on the left atrial surface of the device at 42 days after implantation

Neoendothelialization on the right atrial surface of the device at 36 days after implantation

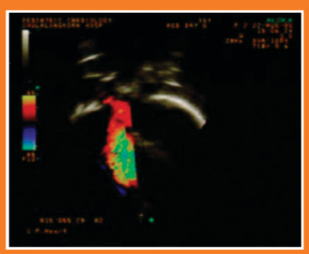


Neoendothelialization on the right atrial surface of the device at 42 days after implantation

Clinical Case



Pre closure - ASD* size of 26 mm



Pre closure - left to right shunt by Color Doppler

Four chamber view showing complete ASD closure - 180 days after Cocoon device implantation

Parasternal short axis view showing complete ASD closure - 180 days after Cocoon device implantation
